

SEP 08 1982

Diamond Head Oil & Refining

Michael V. Polito
Emergency Response & Hazardous Materials Inspection Branch

Richard Tisch, Chief
Water Enforcement Branch

THRU: Fred N. Rubel, Chief
Emergency Response & Hazardous Materials Inspection Branch

Attached please find a report (with photographs) prepared by Ecology and Environment, the EPA Region II Technical Assistance Team contractor, as a result of their site visit of August 25, 1982. This visit was conducted at my direction, in response to the recent interest expressed by the State of New Jersey Deputy Attorney General Adrian Isacoff in the facility.

The facility demolition I believe was part of an SPCC agreement negotiated with the property owner, Newton Oil and Refining, and attorneys in your branch, including the formerly EPA employed attorney, Richard Weinstein.

Please review any settlement agreements on file in your office to determine if any additional work on the part of the Emergency Response & Hazardous Materials Inspection Branch is required.
